Version 16

Feature Upgrade Procedures

These procedures describe the steps to upgrade an existing Restaurant Manager, Version 12.x or later system with optional features/modules. This includes adding POS stations, and/or optional modules, such as Credit Card Authorization module. Please follow these instructions **CAREFULLY**.

Note: prior to performing the upgrade, you must obtain an 8 digit upgrade code from ASI.

1. Copy the latest Upgrade.exe program to the Restaurant Manager working directory. The latest version can be downloaded from the ASI web site www.ActionSystems.com (under dealer services, tech support, patches and utilities, common modules & utilities).

2. Execute Upgrade.exe.

3. Using the up and down arrow keys, highlight the option or options you wish to turn on or off and press <Enter> to make a change. Press <Enter> once to enable an option, and press <Enter> again to disable an option, or leave it unchanged.

4. When the options are set correctly, press the down arrow key repeatedly to highlight the option "Proceed with upgrade." Press <Enter>. You will be prompted for the upgrade code. Note: Serial number field can not be edited.

5. Enter the upgrade code provided by ASI
